DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed. The following is an examiner's statement of reasons for allowance: The prior art of records does not teach or suggest the limitations "a unified database that maintains optical link state information independent of data structure of underlying routing protocols and a protocol independent generic interface between the unified database and applications requiring access to the optical link state information" in claims 1 and 11. The closest prior art, Houston et al. (US 6,778,541) discloses Dynamic data tunneling and Andersson et al. (US publication no. 2002/0004843) discloses System, device and method for bypassing network changes in a routed communication network, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- a. Houston et al. U.S. publication no. 2002/0067731. Dynamic data tunneling
 - b. Andersson et al. U.S. publication no. 2002/0004843. System, device and method for bypassing network changes in a routed communication network
 - c. Houston et al. U.S. patent no. 6,778,541. Dynamic data tunneling
